

The EWA [Wireless System Investment Model](#) is an interactive ROI tool to calculate and compare the annual and cumulative expenses for a commercial cellular versus a private carrier or a private internal network over a ten-year period.

The Wireless System Investment Model calculates and compares the different wireless systems enabling you to create custom proposals and research for your customer's communication needs. To learn more about its features and benefits, you can view our [webinar](#).

This easy-to-use model is available to EWA Members at no cost. If you have an EWA/Cevo account, we can activate you for this service immediately. Email donna.yudkin@enterprisewireless.org to request access.

If you need to obtain an account, go to our [website](#) to register; once the account has been approved, we can activate you for the investment model.

If you have any questions, call Donna Yudkin at 703-797-5103.
